

XENON[®] SA

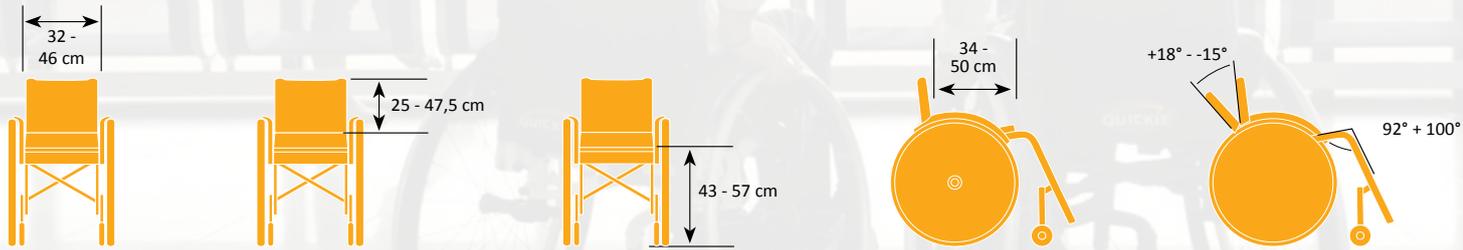

QUICKIE[®]
Live without limits.

One of the lightest folding wheelchairs in the world, with swing away leg rests

Xenon SA is one of the lightest folding wheelchairs in the world. It is easy to lift, transport and fold, and has been cleverly designed with the latest technology, to create the kind of minimalistic style that you would expect from a rigid chair.

Technical data

Seat width	32 - 46 cm	Seat height rear	38 - 50 cm
Seat depth	34 - 50 cm	Seat angle	0° - 12°
Back height	25 - 47,5 cm	Frame angle	92° & 100°
Back angle	-15° to +18°	Weight	from 9.7 kg

TGA#: 100934

Warranty: Limited Lifetime

Adjustable axle adapter

Offer two centre of gravity positions, camber 0°; 2°; 4° and adjustable wheel spacing - all in one lightweight piece and quick adjustability with only two screws.

Dynamic Folding System

The cross brace has been cleverly designed to sit neatly under the seat, leaving a minimalistic, open frame that has all the style of a rigid chair.

Divided footplates

Colour- matched to your wheelchair, with intergrated angles and depth adjustment for perfect adjustability.

Auto-folding footrest

Innovative release mechanism for left and right operation swings the leg rest in and out for easier access

Platform Foot Rests

Available with the Xenon SA performance (aluminium), composite and carbon fibre footboard. It offers the lightest available footrest solution and offers full transfer space with the one side flip-up mechanism.
