## SEATING SYSTEMS

### Wave Positioning Bases

#### **CPW**

##### **Contoured Positioning Wedge**

Lateral thigh support prevents thigh abduction. Medial thigh support prevents thigh adduction

#### **LPB**

##### **Lateral Positioning Base**

Lateral pelvic support maintains pelvis in centre of seat. Lateral thigh support prevents thigh abduction. Solid base of support offers postural stability

#### **CPB**

##### **Contoured Positioning Base**

Lateral pelvic support maintains pelvis in centre of seat. Lateral thigh support prevents thigh abduction. Medial thigh support prevents thigh adduction. Solid base of support offers postural

### Seating Accessories

#### **Cheat Sheets**

Cheat sheets are sheets of adhesive-backed foam used to create custom seating solutions. Cheat Sheets can be layered to create medial/lateral thigh supports or to accommodate an obliquity.

#### **Drop Base System**

The Drop Base is essential for wheelchair users who need to sit lower for self-propelling or transferring.

#### **Rigidizers (Solid Inserts)**

Varilite Rigidizers counter the effects of sling seating. A rigidizers offers an easy and cost-effective solution to the problem of

#### **Wedge**

The modifiable wedge increases the weight-bearing load on the back of the thighs and decreases the load on the buttocks, without changing the seat-to-back angle. The 5cm (2") tapered wedge trims easily for custom
